INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/IE97/00030

I. Basis of the report

1. This report has been drawn on the basis of (*substitute sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments.*):

Description, pages:

1-16 as originally filed

Claims, No.:

1-39 as originally filed

2. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
☐ the claims, Nos.:
☐ the drawings, sheets:

3. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

4. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes:	Claims	1-39

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

2. Citations and explanations

see separate sheet

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

see separate sheet

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/IE97/00030

Section V:

1. Reference is made to the following documents:

D1: WO-A-9317668
D2: WO-A-9415587
D3: US-A-4767628
D4: US-A-3773919
D5: EP-A-0556917

2. The methods as defined in present claims 1, 22 and 29 are regarded to be new (Art. 33(2) PCT) with respect to the documents cited in the international search report.

In D1, D3-D5 no ionic conjugate containing a free carboxyl group-containing polymer and a free amino group containing drug is disclosed. D2 discloses said ionic conjugate, but not the claimed methods of making microparticles thereof.

3. The problem of the present application was to provide a method for preparing microparticles of a sustained release ionic conjugate wherein the particles have a similar size and shape. It appears that the methods defined in present claims 1, 22 and 29 refer to a precipitation method and a evaporation method which as such are known methods in the art for the preparation of microparticles (e.g. D1 pages 6 and 7). However, as the ionic conjugate of the present application represents a combination of two compounds which are not chemically bound, the skilled person would not have expected that it behaves in the same manner as the polymers/drugs disclosed in D1, D3-D5. Therefore the skilled person had no hint to use the processes disclosed in D1, D3-D5 in order solve the posed problem.

Section VII:

Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the document D1. is not mentioned in the description, nor is this document identified therein.

Claims 38 and 39 contain a reference to the description and are therefore not admissible in each country..
